RESTful APIs & Web Services | WebSockets | PHP | SQL | Git | Go

PROFESSIONAL EXPERIENCE

EXTREME ARTS & SCIENCES, Seattle, WA

11/2017 – Present

Full Stack Developer (12/2018 – Present)

- Build and contribute to web applications using HTML5, CSS3/Sass, JavaScript, TypeScript, and ReactJS.
- Responsible for WCAG 2.0 compliance and web performance audits, remediation strategy, and improvements.
- Used JavaScript to develop a GDPR-compliant metrics framework to interface with third-party dependencies such as tracking pixels and cookie banners.
- Used PHP and Google APIs to build email template generator and testing tool to standardize team collaboration, ensure cross-platform email template compatibility, and improve email deliverability.
- Navigated COVID-19 pandemic by implementing a virtual-first system transition that incorporated a video player model, downloadable assets, and further gamification of the event registration process to drive engagement.
- Developed CLI tool and localized admin dashboard widgets, enabling stakeholders to manage event scheduling, analytics, and A/B test frontend UI elements and email marketing campaigns.
- Use Git to manage repositories, Docker as a container service, and JIRA as project bug tracking tool.
- Participate in code reviews to ensure bug-free, high-performance, maintainable code.
